

Rigging and Lifting

In the rigging and lifting course, participants learn how to rig loads and how to move them safely in combination with the crane operator. Various subjects will be dealt with during the lessons. An assessment will take place on the final day of the (basic) training, in the form of a practical test. If this assessment is positive, the participant will receive the Certificate of Expertise for Rigging and Lifting.

Content

Theory/practice

- lifting equipment
- various cranes
- safety aspects of lifting equipment
