

Working safely with an Aerial Working Platform

Operators of an Aerial Work Platform should meet high demands to work as safely and responsible as possible. Therefore, it is important that operators meet the latest safety regulations. Furthermore, the employer has the obligation that he is able to prove that the driver of the Aerial Working Platform is sufficiently educated according to the working conditions act.

An employer meets the requirements of the working conditions act if the participant successfully completed the practical assessment of the course and has received a certificate.
