

BEDRIJFSOPLEIDINGEN

Fixing building loads

It is risky to move loads. A load could fall out of the crane or hoist when the load is fixed incorrectly. Therefore, it is important to use the correct lifting equipment, fixing the loads in a decent way and communicate efficiently.

A participant is able to work safely, responsible and efficient way after successfully following the course “fixing building loads”. Additionally, it is required to successfully succeed the theoretical assessment before participating the practical part.
