

ATEX basic & awareness

Working in small or enclosed spaces can lead to risky situations; the use of power tools increases the risk of explosions. The ATEX course outlines the main procedures you must follow to avoid these risks. The directive lays out the minimum requirements that workplaces and work equipment must comply with, so that employees can work safely.

The ATEX course is meant for anyone who carries out work in potentially explosive areas, this includes operators, production employees, cleaning and supporting office staff.

ATEX Awareness

In the ATEX Awareness online training course participants are made aware of the basic principles of explosions, how an explosion environment is created, how careful you have to be, and what safety measures you need to take. Gas, mist and dust explosions are discussed in particular. ATEX 114 and ATEX 153 are the new guidelines that have been included since 2016.

The ATEX 153 guideline is included in the ARBO legislation. The ATEX 114 directive applies to manufacturers of safety systems and devices that are used in places where there is a risk of explosion. The purpose of these guidelines is to ensure the safety and health of workers in potentially explosive areas. The ATEX directive specifies minimum requirements that workplaces and work equipment must comply with, so that employees can work safely in those places.

Content

Online ATEX Basic course consists of the following modules:

- What is an explosion?
- Guidelines and legislation
- Gas and dust properties
- Zones
- Protective measures for ignition
- Work safely

Online ATEX Awareness course consists of the following modules:

- ATEX Awareness

ATEX Basic

Online test exam

With the test exam we simulate the independent exam. The candidate has a maximum of 60 minutes for the ATEX Basic exam. Learn from the mistakes you made by looking back with feedback.

Independent exam

The ATEX exam is an independent written exam. The candidate has a maximum of 60 minutes for the ATEX Basic exam.

Result

The candidate takes a written exam at one of the locations in the Netherlands. After passing, the student will receive a digital certificate and pass within two weeks. The certificate is valid for three years.

ATEX Awareness

Online final exam

The course is concluded with the online final exam.

Result

After you have successfully completed the final test, you will receive the digital certificate as a PDF document. Approximately two weeks after the result, if successful, you will receive a pass in credit card format by post.

For whom?

ATEX Basic

Operators, production staff, cleaning staff, supporting office staff and furthermore for everyone who works in or near an explosion hazard environment.

ATEX Awareness

For everyone who has to perform short-term work in an ATEX environment and who must have basic knowledge of gas and dust explosions in order to prevent this.

Requirements

None.

Duration

ATEX Basic

4 hours for the online learning + 60 minutes for the ATEX exam.

ATEX Awareness

Approx. 1,5 hours

Price per participant On Request

ATEX basic

€ 175,-

ATEX awareness

€ 69,-

Price is for course year 2020-2021.
Prices are excl VAT
